Number of seat

1 You may NOT use a calculator.

2 Write your working and answers in the spaces provided. Additional space is provided at the end of this question-answer book for use if required. If you use this space, write clearly the number of the question involved.

3 Full credit will be given only where the solution contains appropriate working.

4 Before leaving the examination room you must give this book to the invigilator. If you do not you may lose all the marks for this paper.
FORMULAE LIST

Circumference of a circle: \( C = \pi d \)
Area of a circle: \( A = \pi r^2 \)

Theorem of Pythagoras:

\[
\begin{align*}
\text{c} & \quad \text{b} \\
\text{a} &
\end{align*}
\]
\[ a^2 + b^2 = c^2 \]

Trigonometric ratios in a right angled triangle:

\[
\begin{align*}
\text{hypotenuse} & \quad \text{opposite} \\
x^\circ & \quad \text{adjacent}
\end{align*}
\]

\[
\begin{align*}
\tan x^\circ &= \frac{\text{opposite}}{\text{adjacent}} \\
\sin x^\circ &= \frac{\text{opposite}}{\text{hypotenuse}} \\
\cos x^\circ &= \frac{\text{adjacent}}{\text{hypotenuse}}
\end{align*}
\]
ALL questions should be attempted.

1. (a) Find $6.23 - 3.7$.

(b) Find 5% of £140.

(c) Find $-40 + 15$.

2. A rule used to calculate the cost in pounds of electricity is:

\[
\text{Cost} = 19 + (\text{number of units used} \times 0.07)
\]

Find the cost of 600 units of electricity.
3. (a) An inter-city coach left Aberdeen at 10.40 am and reached Inverness at 1.25 pm.
   How long did the journey take?

   (b) The average speed of the coach during the journey was 40 miles per hour.
   Find the distance between Aberdeen and Inverness.

4. Solve algebraically the equation

   \[ 8c + 3 = 31 + c. \]
5. Andy wants to make 150 copies of a music booklet. 8 sheets of paper are required for each booklet.

(a) Find the total number of sheets required.

Paper is sold in packets which contain 500 sheets.

(b) How many packets of paper will Andy need to buy?

6. Solve algebraically the inequality

\[ 9m - 2 > 70. \]
7. (a) Complete the table below for \( y = 1.5x - 1 \).

<table>
<thead>
<tr>
<th></th>
<th>(-2)</th>
<th>(0)</th>
<th>(6)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(x)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(y)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

(b) Draw the line \( y = 1.5x - 1 \) on the grid.
8. In a local election the number of votes for each of the four candidates is shown in the table below.

<table>
<thead>
<tr>
<th>Candidate</th>
<th>Votes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smith</td>
<td>380</td>
</tr>
<tr>
<td>Patel</td>
<td>240</td>
</tr>
<tr>
<td>Green</td>
<td>100</td>
</tr>
<tr>
<td>Jones</td>
<td>170</td>
</tr>
</tbody>
</table>

On the grid below, draw a bar graph to show this information.

Three of them are female.
What percentage of the staff is female?
10. This is a multiplication square.

\[
\begin{array}{|c|c|c|c|}
\hline
8 & \times & 5 & = & 40 \\
\hline \times & \times & \times & \times \\
\hline
10 & \times & -2 & = & -20 \\
\hline = & = & = & = \\
\hline
80 & \times & -10 & = & -800 \\
\hline
\end{array}
\]

(a) Complete this multiplication square.

\[
\begin{array}{|c|c|c|c|}
\hline
3 & \times & -7 & = & \\
\hline \times & \times & \times & \times \\
\hline
-1 & \times & 5 & = & \\
\hline = & = & = & = \\
\hline \times & = & \\
\hline
\end{array}
\]
10. (continued)

(b) Complete this multiplication square.

-5 \times \quad = \quad \hline
\times \quad \times \quad \times \quad \hline
\times \quad = \quad -12 \quad \hline
\hline
\hline
\times \quad -8 \quad = \quad -120

[END OF QUESTION PAPER]

2. A common cold virus is $5 \times 10^{-4}$ millimetres long.
   Write this number in full.
3. (a) Multiply out the brackets and simplify

\[ 5(a + 2b) - 3b. \]

(b) Factorise \[ 6n + 30. \]
4. The income of each employee in a company is shown in this frequency table.

<table>
<thead>
<tr>
<th>Income £</th>
<th>Frequency</th>
<th>Income x Frequency</th>

</tr>
<tr>
<td>Total = 25</td>
<td></td>
<td>Total =</td>
</tr>
</tbody>
</table>

(a) Write down the modal income.

(b) Complete the table above and find the mean income.
5. A room in the Hotel Royale in Paris costs 130 euros per night. The exchange rate is 1.58 euros to the pound.

(a) Find the cost of the hotel room per night in pounds and pence.

(b) Mr and Mrs McQueen are going to Paris. Their return flights cost £59 each.

(b) Find the total cost of their flights and a 3 night stay at the Hotel Royale in pounds and pence.
6. The population of Scotland in 2001 was 5,062,000.
The pie chart shows the age distribution of the population in 2001.

(a) How many people were aged over 64 years?
Give your answer to the nearest thousand.

(b) The pie chart below shows the age distribution of the population of Scotland in 1901.

Describe the differences in the age distributions of the population of Scotland in 1901 and 2001.
7. The diagram below shows two bars of soap. Each bar is in the shape of a cuboid.

(a) Find the volume of the smaller bar.

(b) The smaller bar costs 60 pence. Find the cost per cubic centimetre of the smaller bar.

(c) The larger bar costs 90 pence. Which bar of soap gives better value for money? **Explain clearly the reason for your answer.**
8. Use the formula below to find the value of $R$ when $P = 180$, $M = 7.5$ and $N = 5$.

$$R = \frac{P}{MN}$$

9. The diagram shows the front view of a garage.

[Diagram of a garage with dimensions 2.9 m height, 2 m width, and 3.8 m length]

Calculate the length of the sloping edge of the roof.

Do not use a scale drawing.
10. Gail wants to insure her computer for £2400.

The insurance company charges an annual premium of £1.25 for each £100 insured.

(a) Calculate the annual premium.

(b) Gail can pay her premium monthly.

If she does this she is charged an extra 4%.

Calculate the monthly premium.
11. A television mast is supported by wires.

The diagram below shows one of the wires which is 80 metres long. The wire is attached to the mast 20 metres from the top and makes an angle of 59° with the ground.

Calculate the height of the mast.
Give your answer to the nearest metre.
**Do not use a scale drawing.**
12. The diagram below shows a window.

The window consists of a rectangle and a semi-circle. Calculate the area of the window. Give your answer in square metres correct to 2 decimal places.
