## 2007 Mathematics

## Intermediate 1 Units 1, 2 \& 3 Paper 1

## Finalised Marking Instructions

The information in this publication may be reproduced to support SQA qualifications only on a non-commercial basis. If it is to be used for any other purposes written permission must be obtained from the Assessment Materials Team, Dalkeith.

Where the publication includes materials from sources other than SQA (secondary copyright), this material should only be reproduced for the purposes of examination or assessment. If it needs to be reproduced for any other purpose it is the centre's responsibility to obtain the necessary copyright clearance. SQA's Assessment Materials Team at Dalkeith may be able to direct you to the secondary sources.

These Marking Instructions have been prepared by Examination Teams for use by SQA Appointed Markers when marking External Course Assessments. This publication must not be reproduced for commercial or trade purposes.

## General Marking Principles

These principles describe the approach to be taken when marking Intermediate 1 Mathematics papers. For more detailed guidance please refer to the notes which are included with the Marking Instructions.

1 Marks must be assigned in accordance with the Marking Instructions. The main principle in marking scripts is to give credit for the skills demonstrated and the criteria met. Failure to have the correct method may not preclude a candidate gaining credit for the calculations involved or for the communication of the answer.

2 The answer to one part of a question, even if incorrect, must be accepted as a basis for subsequent dependent parts of the question. Full marks in the dependent part(s) may be awarded provided the question is not simplified.

3 The following should not be penalised:

- working subsequent to a correct answer (unless it provides firm evidence that the requirements of the question have not been met)
- omission or misuse of units (unless marks have been specifically allocated for the purpose in the marking scheme)
- bad form, eg $\sin x^{\circ}=0.5=30^{\circ}$
- legitimate variation in numerical values / algebraic expressions.

4 Solutions which seem unlikely to include anything of relevance must nevertheless be followed through. Candidates still have the opportunity of gaining one mark or more provided the solution satisfies the criteria for the mark(s).

5 Full credit should only be given where the solution contains appropriate working. Where the correct answer may be obtained by inspection or mentally, credit may be given, but reference to this will be made in the Marking Instructions.

6 In general markers will only be able to give credit for answers if working is shown. A wrong answer without working receives no credit unless specifically mentioned in the Marking Instructions. The rubric on the outside of the question papers emphasises that working must be shown.

7 Sometimes the method to be used in a particular question is explicitly stated; no credit should be given where a candidate obtains the correct answer by an alternative method.

8 Where the method to be used in a particular question is not explicitly stated, full credit must be given for alternative methods which produce the correct answer.

9 Do not penalise the same error twice in the same question.
10 Do not penalise a transcription error unless the question has been simplified as a result.
11 Do not penalise inadvertent use of radians in trigonometry questions, provided their use is consistent within the question.

## Practical Details

The Marking Instructions should be regarded as a working document and have been developed and expanded on the basis of candidates' responses to a particular paper. While the guiding principles of assessment remain constant, details can change depending on the content of a particular examination paper in a given year.

1 Each mark awarded in a question is referenced to one criterion in the marking scheme by means of a bullet point.

2 Where a candidate has scored zero marks for any question attempted, " 0 " should be shown against the answer in the place in the margin.

3 Where a marker wishes to indicate how s/he has awarded marks, the following should be used:
(a) Correct working should be ticked, $\checkmark$.
(b) Where working subsequent to an error is followed through, if otherwise correct and can be awarded marks, it should be marked with a crossed tick, $\mathfrak{X}$.
(c) Each error should be underlined at the point in the working where it first occurs.

4 Do not write any comments, words or acronyms on the scripts.

Mathematics Intermediate 1: Paper 1, Units 1, 2 and 3

| $\begin{aligned} & \text { Question } \\ & \text { No } \end{aligned}$ | Marking Scheme Give 1 mark for each - | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 1 (a) | Ans: 19.22 <br> - ${ }^{1}$ process: calculate $8 \cdot 52+10 \cdot 7$ | $\bullet^{1} 19 \cdot 22$ ( mark |
| (b) | Ans: 0.47 <br> - ${ }^{1}$ process: calculate $3.76 \div 8$ | -10.47 $\mathbf{1}$ mark |
| (c) | Ans: $\frac{57}{1000}$ <br> - ${ }^{1}$ process: change 0.057 into a fraction | - $\quad \frac{57}{1000}$ <br> 1 mark |
| (d) | Ans: £288 <br> - ${ }^{1}$ strategy: correct method <br> - ${ }^{2}$ process: calculate $90 \%$ of $£ 320$ | - 1 eg $320 \div 10 \times 9$ or equivalent <br> - 288 <br> 2 marks |
| NOTES: <br> 1. <br> 2. | Correct answer without working $8 \cdot 8(0)$ no working necessary | award $2 / 2$ <br> award 1/2 |
| 2 | Ans: $\mathbf{£ 6 1 \cdot 2 0}$ <br> - ${ }^{1}$ strategy: correct method <br> - ${ }^{2}$ process: multiply correctly (see note 3 ) | - ${ }^{1} \quad 8 \times 7 \cdot 65$ <br> - ${ }^{2} \quad 61 \cdot 2(0)$ <br> 2 marks |
| NOTES: <br> 1. <br> 2. <br> 3. | Correct answer without working <br> Do not award 1st mark for eg $8 \times 7.65+8000$ <br> ${ }^{\text {nd }}$ mark only available for correctly multiplying 7 000 etc | award $2 / 2$ <br> 65 by any number $>6$ except 10,100 , |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each - |
| :---: | :---: | :---: |
| 3 | Ans: $\mathrm{a}<9$ <br> - ${ }^{1}$ process: collect constants <br> - ${ }^{2}$ process: solve inequality for a | - $\quad 7 \mathrm{a}<63$ <br> - ${ }^{2} \quad \mathrm{a}<9$ <br> 2 marks |
| NOTES: <br> 1. <br> 2. | For answers without valid working <br> eg (i) $a<9$ without working <br> (ii) $7 \times 9+6<69 \rightarrow \mathrm{a}<9$ <br> Answers acceptable for partial credit (valid wor <br> (i) 7 a $<63 \rightarrow<9$ <br> (ii) $7 \mathrm{a}<63 \rightarrow \mathrm{a}=9$ or $7 \mathrm{a}=63 \rightarrow \mathrm{a}=9$ <br> (iii) 7a<75 $\rightarrow \mathrm{a}<10 \cdot 7$ (disregard incorrect | award 1/2 <br> gust be shown) <br> award 1/2 |
| 4 | Ans: $\mathbf{7 . 8}$ minutes <br> - communicate/process: complete table <br> - ${ }^{2}$ strategy: know to divide $\Sigma \mathrm{fx}$ by 50 <br> - ${ }^{3}$ process: correctly divide $\Sigma \mathrm{fx}$ | $\begin{array}{ll}-108 \\ & \underline{60} \\ \underline{390} \\ & -290 \div 50\end{array}$ <br> -3 $\quad 7 \cdot 8$ <br> 3 marks |
| NOTES: <br> 1. <br> 2. <br> 3. |  <br> Award of $1^{\text {st }}$ mark <br> 108, 60 and 390 need not appear in table but mu <br> Do not award $3^{\text {rd }}$ mark for a division by 10 or a eg $390 \div 6=65,389 \div 10=38 \cdot 9,400 \div 50=8$ Acceptable answers to division should be round eg $388 \div 6=64 \cdot 6 \ldots$ or $64 \cdot 7$ | $\frac{\text { Criterion for 1st mark not met }}{2 / 3}$ <br> $0 / 3$ <br> be shown in working vision with a whole number answer or truncated to at least one decimal place |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 5 (a) | Ans: -7,-3,9 <br> - ${ }^{1}$ process: calculate y when $\mathrm{x}=-1$ <br> $\bullet^{2} \quad$ process: calculate $y$ when $x=0$ and $x=3$ | $\bullet^{1} \quad-7$ <br> - ${ }^{2} \quad-3$ and 9 <br> 2 marks |
| (b) | Ans: straight line graph of $y=4 x-3$ <br> - ${ }^{1}$ communicate: prepare to draw line <br> - ${ }^{2} \quad$ communicate: draw the line $y=4 x-3$ | - ${ }^{1} \quad$ all three points from table plotted correctly <br> - ${ }^{2}$ draw straight line through the four points shown in the table |
| NOTES: <br> 1 <br> 2 | If the line $y=4 x-3$ is drawn (minimum acceptable length: line joining $(-1,-7)$ to <br> Where the four points in the table satisfy $y=x$ or $y=$ through the four points | $(1,1) \text { or }(0,-3) \text { to }(2,5)) \quad \text { award } 2 / 2$ <br> $2-x$ then award $1 / 2$ for drawing a line |
| 6 | Ans: 8 cm <br> - ${ }^{1}$ strategy: know to let lbh $=$ volume of container <br> - ${ }^{2}$ strategy: know how to find height of container <br> -3 process: carry out all calculations correctly | - ${ }^{1} \quad 20 \times 10 \times \mathrm{h}=1600$ <br> - $2 \frac{1600}{20 \times 10}$ <br> - ${ }^{3} 8$ <br> 3 marks |
| NOTES: <br> 1. <br> 2. | 8 with no working <br> Answers acceptable for partial credit (working must <br> (i) $20 \times 10 \times 80$ <br> (ii) $1600 \div(20+10)=53 \cdot 3 \ldots$ <br> (iii) $1600-200=1400$ | award $0 / 3$ <br> be shown) <br> award $2 / 3$ <br> award $2 / 3$ <br> award $1 / 3$ |

| Question No | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each • |
| :---: | :---: | :---: |
| 7 (a) | Ans: -8 <br> - ${ }^{1}$ process: calculate $2 \times(-2) \times 2$ | $\bullet^{\mathbf{1}} \quad-8 \quad \mathbf{1}$ mark |
| (b) | Ans: 17 <br> - process: calculate $11-(-6)$ | ${ }^{-1} \quad 17$ <br> 1 mark |
| NOTES: |  |  |
| 8 | Ans: see below <br> - ${ }^{1}$ interpret: interpret information <br> -2 strategy: find some possibilities <br> -3 strategy: find all possibilities | - ${ }^{1}$ one correct row <br> - ${ }^{2}$ two more correct rows <br> - ${ }^{3}$ final two correct rows |
| NOTES: <br> 1. | Where there are missing or incorrect totals <br> a) 5 rows of ticks "correct" <br> (b) 2 rows of ticks "correct" | m of 2 marks is available <br> award $2 / 3$ <br> award $1 / 3$ |

## NOTES:

1. 

(a) $3(11+7)$
(b) $\frac{1}{2} \times 6 \times 18$
(c) $\frac{1}{2} \times 6 \times 11+\frac{1}{2} \times 6 \times 7$

- ${ }^{2}=3 \times 18$
$=\frac{1}{2} \times 108$
$=3 \times 11+3 \times 7$
or

$$
\frac{1}{2} \times 66+\frac{1}{2} \times 42
$$

| Final answer |  | With working | Without working |
| :--- | :--- | :---: | :---: |
| 54 | $3 / 3$ | $3 / 3$ |  |
| 108 | $(6 \times 18)$ | $2 / 3$ | $0 / 3$ |
| 40 | $(3 \times 11+7)$ | $2 / 3$ | $0 / 3$ |
| 75 | $\left(\frac{1}{2} \times 66+42\right)$ | $2 / 3$ | $0 / 3$ |
| $36 \cdot 5$ | $\left(\frac{1}{2} \times[66+7]\right)$ | $2 / 3$ | $0 / 3$ |
| 73 | $(66+7)$ | $1 / 3$ | $0 / 3$ |
| 21 | $(3+18)$ | $1 / 3$ | $0 / 3$ |
| 231 | $(3 \times 11 \times 7)$ | $1 / 3$ | $0 / 3$ |
| 24 | $(6+11+7)$ | $0 / 3$ | $0 / 3$ |
| 12 | $\left(\frac{1}{2}[6+11+7]\right)$ | $0 / 3$ | $0 / 3$ |

TOTAL MARKS FOR PAPER 1
[END OF MARKING INSTRUCTIONS]

## 2007 Mathematics

## Intermediate 1 Units 1, 2 \& 3 Paper 2

## Finalised Marking Instructions

These Marking Instructions have been prepared by Examination Teams for use by SQA Appointed Markers when marking External Course Assessments. This publication must not be reproduced for commercial or trade purposes.

## General Marking Principles

These principles describe the approach to be taken when marking Intermediate 1 Mathematics papers. For more detailed guidance please refer to the notes which are included with the Marking Instructions.

1. Marks must be assigned in accordance with the Marking Instructions. The main principle in marking scripts is to give credit for the skills demonstrated and the criteria met. Failure to have the correct method may not preclude a candidate gaining credit for the calculations involved or for the communication of the answer.
2. The answer to one part of a question, even if incorrect, must be accepted as a basis for subsequent dependent parts of the question. Full marks in the dependent part(s) may be awarded provided the question is not simplified.
3. The following should not be penalised:

- working subsequent to a correct answer (unless it provides firm evidence that the requirements of the question have not been met)
- omission or misuse of units (unless marks have been specifically allocated for the purpose in the marking scheme)
- bad form, eg $\sin x^{\circ}=0.5=30^{\circ}$
- legitimate variation in numerical values/algebraic expressions.

4. Solutions which seem unlikely to include anything of relevance must nevertheless be followed through. Candidates still have the opportunity of gaining one mark or more provided the solution satisfies the criteria for the mark(s).
5. Full credit should only be given where the solution contains appropriate working. Where the correct answer may be obtained by inspection or mentally, credit may be given, but reference to this will be made in the Marking Instructions.
6. In general markers will only be able to give credit for answers if working is shown. A wrong answer without working receives no credit unless specifically mentioned in the Marking Instructions. The rubric on the outside of the question papers emphasises that working must be shown.
7. Sometimes the method to be used in a particular question is explicitly stated; no credit should be given where a candidate obtains the correct answer by an alternative method.
8. Where the method to be used in a particular question is not explicitly stated, full credit must be given for alternative methods which produce the correct answer.
9. Do not penalise the same error twice in the same question.
10. Do not penalise a transcription error unless the question has been simplified as a result.
11. Do not penalise the inadvertent use of radians in trigonometry questions, provided their use is consistent within the question.

## Practical Details

The Marking Instructions should be regarded as a working document and have been developed and expanded on the basis of candidates' responses to a particular paper. While the guiding principles of assessment remain constant, details can change depending on the content of a particular examination paper in a given year.

1. Each mark awarded in a question is referenced to one criterion in the marking scheme by means of a bullet point.
2. Where a candidate has scored zero marks for any question attempted, " 0 " should be shown against the answer in the place in the margin.
3. Where a marker wishes to indicate how $\mathrm{s} /$ he has awarded full marks, the following should be used:
(a) Correct working should be ticked, $\checkmark$.
(b) Where working subsequent to an error is followed through, if otherwise correct and can be awarded marks, it should be marked with a crossed tick, $\mathfrak{\nwarrow}$.
(c) Each error should be underlined at the point in the working where it first occurs.
4. Do not write any comments, words or acronyms on the scripts.

Mathematics Intermediate 1: Paper 2, Units 1, 2 and 3

| $\begin{gathered} \text { Question } \\ \text { No } \end{gathered}$ | Marking Scheme Give 1 mark for each • | Illustrations of evidence for awarding a mark at each - |
| :---: | :---: | :---: |
| 1 (a) | Ans: 16 <br> - ${ }^{1}$ interpret: interpret bar graph | - 16 <br> 1 mark |
| (b) | Ans: B <br> - ${ }^{1}$ interpret: identify mode | - ${ }^{1}$ B <br> 1 mark |
| NOTES: |  |  |
| 2 | Ans: $\mathbf{1 . 5 \times 1 0}{ }^{\mathbf{8}}$ <br> - ${ }^{1}$ process: express in standard form <br> - ${ }^{2}$ process: express in standard form | $\begin{aligned} & \bullet \bullet^{1} \quad \bullet^{2} \cdot 5(0) \times 10^{8} \\ & \quad \quad \text { (award } 1 \text { for } 1 \cdot 5(0) \times 10^{\mathrm{n}}[\mathrm{n} \geq 2] \\ & \left.150 \times 10^{6}, 15(\cdot 0) \times 10^{7}, 1 \cdot 5(0) \times 10^{8}\right) \end{aligned}$ <br> 2 marks |
| NOTES: |  |  |

2. 3rd mark is not available for division by whole number of hours.

2. For the award of the 3rd mark an answer of the form $y=$ is required.
3. Answers acceptable for partial credit (valid working must be shown)
(i) $14 y=56 \rightarrow 4$
(ii) $14 y=32 \rightarrow y=2 \cdot 2 \ldots$
(disregard incorrect rounding)
(iii) $20 y=56 \rightarrow y=2 \cdot 8 \ldots$
award $2 / 3$
(iv) $20 y=32 \rightarrow y=1 \cdot 6$
award $1 / 3$

| $\begin{gathered} \hline \text { Question } \\ \text { No } \end{gathered}$ | Marking Scheme Give 1 mark for each - | Illustrations of evidence for awarding a mark at each • |
