## Methods in Algebra and Calculus Assessment Standard 1.1

1 Express $\frac{x^{2}+24}{x^{3}+8 x}$ in partial fractions.

## Methods in Algebra and Calculus Assessment Standard 1.2

2 Differentiate the following function with respect to $x$ :

$$
\begin{equation*}
f(x)=e^{x^{2}-6 x} . \tag{2}
\end{equation*}
$$

3 Given $y=\sqrt{\tan 5 x}$, find $\frac{d y}{d x}$.

4 Differentiate the following functions with respect to $x$ :
a) $f(x)=4 x^{5} \sin x$
b) $g(x)=\frac{3 x+2}{x-4}, x \neq 4$.

5 Differentiate the following function with respect to $x$ :

$$
\begin{equation*}
f(x)=\sin ^{-1}(6 x), \quad-\frac{1}{6} \leq x \leq \frac{1}{6} . \tag{2}
\end{equation*}
$$

6 If $x^{5} y+x y^{2}=11$, use implicit differentiation to find $\frac{d y}{d x}$.

7 The position of a golf ball with respect to a coordinate axis system, at time $t$ seconds, is given by :
$x=5 t, \quad y=12 t-2 t^{2}, \quad 0 \leq t \leq 6$.

Find the speed of the golf ball when $t=2$.

## Methods in Algebra and Calculus Assessment Standard 1.3

8
Find :
a) $\int \frac{8}{\sqrt{1-(3 x)^{2}}} d x$
b) $\int \frac{7}{14 x-1} d x$
c) $\int_{0}^{\frac{\pi}{20}} \sec ^{2} 5 x d x$.

9 Using the substitution $u=\cos x$, find $\int \frac{\sin x}{\cos ^{7} x} d x$.

10 Using integration by parts, evaluate $\int_{1}^{2} x^{6} \ln x d x$.

## Methods in Algebra and Calculus Assessment Standard 1.4

11 Find the general solution of the differential equation $\frac{d y}{d x}=\frac{3 y}{x-5}$.

Find the general solution, in the form $y=f(x)$, of the first-order linear differential equation

$$
\begin{equation*}
\frac{d y}{d x}+3 y=7 e^{6 x} \tag{5}
\end{equation*}
$$

13 Find the particular solution of the second-order differential equation

$$
\begin{equation*}
\frac{d^{2} y}{d x^{2}}+4 \frac{d y}{d x}-12 y=0 \text { when } x=0, y=1 \text { and } \frac{d y}{d x}=18 \tag{6}
\end{equation*}
$$
