

### Fractions, Decimals and Percentages (1) - Answers

1.    (a)    £30                      (b)    11kg                      (c)    £2·10                      (d)    33cm  
          (e)    £85                      (f)    45·5g                      (g)    £10·64                      (h)    40·5kg  
          (i)    £4·68                      (j)    £4·25                      (k)    369mm                      (l)    £0·81  
          (m)    £1397                      (n)    270 tonnes                      (o)    7·5kg
  
2.    (a)    £25·20                      (b)    150g                      (c)    £6·75                      (d)    25·2kg  
          (e)    £1·70                      (f)    28·9cm                      (g)    £12·16                      (h)    £17  
          (i)    £572                      (j)    360g                      (k)    £225                      (l)    £338·40  
          (m)    £1170                      (n)    £0·72                      (o)    84 tonnes
  
3.    (a)    £4·75                      (b)    £3·05                      (c)    £1·14                      (d)    42p  
          (e)    £5·95                      (f)    21p                      (g)    £2·20                      (h)    £13·65  
          (i)    £41·73                      (j)    £2·79                      (k)    £0·23                      (l)    30p  
          (m)    £1·09                      (n)    £0·36                      (o)    55p
  
4.    (a)    60%                      (b)    25%                      (c)    28%                      (d)    70%  
          (e)    19%                      (f)    95%                      (g)    56%                      (h)    27%  
          (i)    78%                      (j)    42%                      (k)    13%                      (l)    62%  
          (m)    13%                      (n)    43%                      (o)    19%                      (p)    10%  
          (q)    30%                      (r)    31%

5.    (a)
