- A straight line with gradient -3 passes through the point (-4, 14).
 - Determine the equation of this straight line in its simplest form. (2)
- 2 Solve the inequation 4p 11 . (3)
- The Khan family visit a new attraction in Edinburgh. They paid £ $37 \cdot 62$ for 3 adult tickets and 5 child tickets.

Write an equation to represent this information. $(#^{2.1})$

4 Solve the following system of equations algebraically:

$$3a + 2b = 16$$
$$a - b = 2$$

(3)

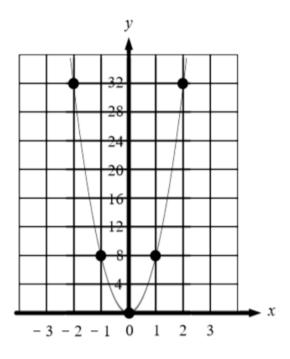

This formula is used to convert temperature from degrees Newton (${}^{\circ}N$) to degrees Fahrenheit (${}^{\circ}F$):

$$F = \frac{60 \,\text{N}}{11} + 32$$

Change the subject of the formula to N. (3)

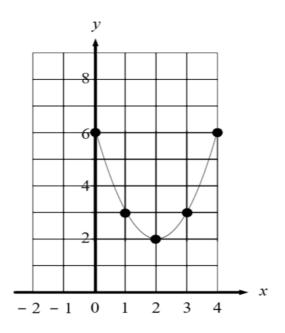

6 The diagram shows the parabola with equation $y = k x^2$.

What is the value of k? (1)

7 The equation of the quadratic function whose graph is shown below is of the form $y = (x + a)^2 + b$, where a and b are integers.

Write down the values of a and b.

(2)

8 Sketch the graph y = (x + 3)(x - 1) on plain paper.

Mark clearly where the graph crosses the axes and state the coordinates of the turning point.

9 A parabola has equation $y = (x - 3)^2 - 2$.

(3)

(b) Write down the coordinates of the turning point on the parabola and state whether it is a maximum or minimum. (2)

Relationships Assessment Standard 1.3

10 Solve the equation
$$(x - 4)(x + 7) = 0$$
. (1)

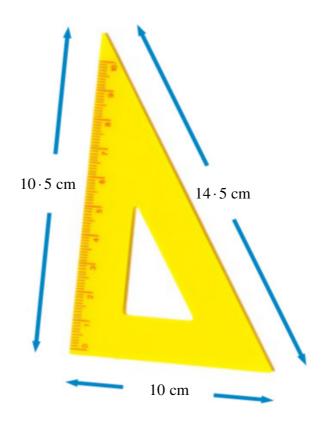

Solve the equation
$$x^2 + 5x - 2 = 0$$
, giving the roots correct to one decimal place. (4)

12 Determine the number of roots of the equation $2x^2 - 3x + 9 = 0$. (2)

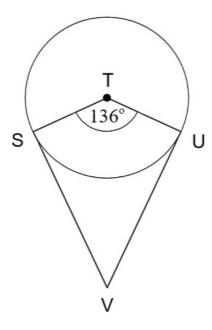

To pass quality control inspections, this set-square must have a perfect right-angle. All necessary measurements are given in the diagram.

Use the Converse of Pythagoras' Theorem to determine whether this set-square passes quality control inspections.

 $(2 \text{ and } \#^{2.2})$

The diagram below shows the design stages of a kite. Kite STUV and a circle with centre T are detailed in the diagram.

SV is the tangent to the circle at S and UV is the tangent to the circle at U.

(3)

Given that angle STU is 136°, calculate angle SVU.

An Olympic torch used in 2008 is 1 000 mm long. The volume of fuel stored in the tank of an Olympic torch is 32 000 cm³.

A similar version is 250 mm long.

Calculate how much fuel is needed for a miniature Olympic torch. (3)

16 Sketch the graph of
$$y = 4\cos x^{\circ}$$
 for $0 \le x \le 360$. (2)

17 Write down the period of the graph with equation
$$y = \cos 3x^{\circ}$$
. (1)

18 Solve the equation
$$7 \sin x^{\circ} - 1 = 0$$
 for $0 \le x \le 360$. (3)
